

## Smart and scalable residential all-in-one energy storage solution

- ✓ Fast, hassle-free and lower cost installation
- ✓ Scalable and flexible solution
- ✓ Highest safety and optimized performance
- ✓ Smart, Seamless Energy Management

The GoodWe ESA Series is an all-in-one residential energy storage solution (ESS) that combines reliability and advanced functionality. It integrates the inverter, battery, UPS-grade switching, and battery enclosure in a pre-wired modular system-streamlining installation and reducing costs.

Compact, elegantly designed, and IP66-rated for durability, the unit operates reliably indoors or outdoors in any weather conditions. With smart controls, scalable storage, and flexible configurations, the ESA empowers homeowners to manage their energy needs with confidence and ease.

The innovative modular and stackable design ensures adaptability, growing alongside your household energy demands and making true energy independence simpler than ever.

AI-driven EMS and <4ms UPS-level switching

Smart home integration with multi-protocol communications

Allows different capacities of old and new batteries mixing

Supports 6 batteries per stack, scalable up to 48kWh

\*1: If there's no PV, start-up voltage will be 380V.

\*2: When the input voltage is 560V-600V, the inverter will enter standby mode, and the voltage returns to 560V to enter the normal operation state.

\*3: Please refer to the user manual for the MPPT Voltage Range at Nominal Power.

\*4: GOODWE ESA series has internal bypass 63A passthrough ability to support whole home backup solution. If the customer don't want to do any breaker upgrade, the main breaker size in SolarGo (or SEMS+) can be set as previous breaker size.

\*5: If the Back-up port is not used, select an appropriate circuit breaker based on the AC Max. Output Current.
