

DRIVING
THE WORLD'S SMART
ENERGY FUTURE

Message From President & Managing Director Europe

GoodWe offers high-quality storage solutions for all market requirements at affordable prices.

With the introduction of our own batteries GoodWe has lifted its offering for the storage market, which is becoming more and more important, to a new level. With its expanded product portfolio, GoodWe offers its customers the right device for every application - from photovoltaic inverters to storage solutions for utility, commercial and residential applications.”

Smarter Future, Greener World. GoodWe is working jointly with global partners to promote a flourishing renewable energy industry and to create a sustainable future for the earth and for future generations. For me that's the most charming element of being a part of GoodWe and being devoted to this green career.

Thomas Haering

President of Europe

About Us

Established in 2010, GoodWe is a world-leading smart energy solution provider, with the research and manufacturing of PV inverters and energy storage solutions at its core. With a long-standing strong presence in the solar market, GoodWe PV inverters have seen an accumulative installation of 71.2 GW in more than 100 countries.

Made by GoodWe Chosen by GE

Following a rigid and thorough selection process, GoodWe has been selected as the exclusive solar inverter licensing partner for GE's global sales. GoodWe is delighted to enter into this collaboration, which validates the company's status within the solar industry, both for the quality and reliability as well as the technological advancement of its inverters.

Thomas Buccellato, Senior Managing Director, GE Licensing stated, "Our analysts knew we needed world-class products, as we will be targeting the high end of the market where end-user loyalty to the brand also comes with high expectations. GoodWe is the right choice."

Company Award & Ranking

Reliable Partner in Large-scale Projects 2021

DNV issued a review report of GoodWe for its inverter technology and reliability. GoodWe is recognized as a bankable brand with higher product reliability by DNV. Concluded from the report, DNV views GoodWe as a well-established manufacturer of power conversion products with a successful history in design and manufacturing.

Top Quality and Great Lifespan 2015-2021

GoodWe is the sole inverter brand that has won the TÜV Rheinland All Quality Award for 7 consecutive years (2015-2021). More than 10 products for residential, commercial and industrial sectors are all proven to be reliable and have a long lifespan.

Energy Storage Veteran 2021-2024

As an innovation-driven company diving deeply into the energy storage sector for more than 10 years, GoodWe was distinguished as World's Top 3 Storage Inverter Supplier and one of the top three PV inverter suppliers in Europe for the year 2022 & in addition top-ranked in consecutive years by the authoritative SPI Test. The company boasts the most comprehensive portfolio in the industry, providing more than 20 energy storage products featured with advanced technologies such as UPS-level switching, 100% unbalanced output, and smart-load control.

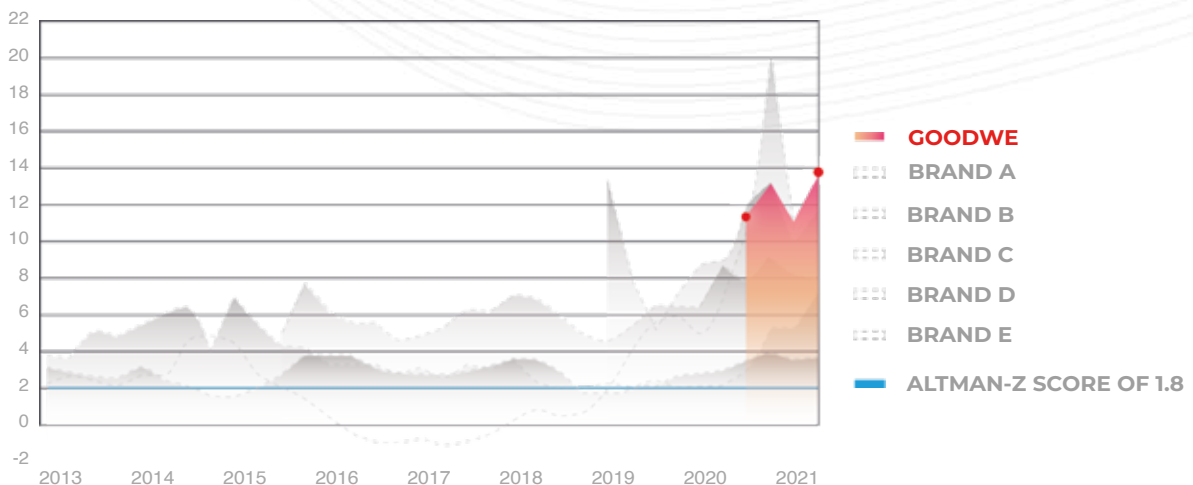

Lead the Way on Sustainability 2022

GoodWe has been awarded a Silver Medal by EcoVadis in 2022, which places it in the top 14% of the 100,000-plus companies across 175 countries that EcoVadis has rated. The award recognizes GoodWe's strong Environmental, Social, and Governance (ESG) performance, and reinforces the company's commitment to sustainable practices.

The **Most Financially Stable** Inverter Company

GoodWe's positive operating performance and solid potential over the period has landed it the highest Altman-Z score among PV manufacturers on BloombergNEF's 2021 report, displaying its strong financial health and bankability.

Devote resources & leverage strengths to fulfill **SDGs**

GoodWe has joined the UN Global Compact and is dedicated to fulfilling corporate social responsibility and practicing the concept of sustainability. GoodWe Solar Academy was established as a pioneering open platform for knowledge sharing and communication in terms of PV industry, products, and applications to all people, aiming at exploring more possibilities within and beyond the industry.

Pursue Carbon Neutrality

GoodWe strives to build low-carbon, green factories in a sustainable manner. With PV systems installed, 2.8 million kWh of electricity can be generated for GoodWe's new manufacturing base every year, which is equivalent to saving 900 tons of standard coal and reducing 2,247 tons of carbon dioxide emissions every year. In the future, GoodWe will have more eco-friendly buildings brought into use. Being designed and constructed to be as eco-friendly as possible, GoodWe's new headquarter is expected to deliver in 2024. This building will be operated with the self-developed Smart Energy Management System (SEMS).
